# SERVO-DRIVE

The new opening support system for more freedom of motion  
TANDEMBOX plus BLUMOTION

## Experience **moving** moments

SERVO-DRIVE is the new opening support system for drawers and pull-outs that will inspire both you and your customers. The reason we are so confident is that during development, we kept our focus on the wants and needs of the kitchen user.

### **SERVO-DRIVE senses**

A brief touch or a light pull is enough - drawers and pull-outs open as if by themselves. SERVO-DRIVE offers full freedom of movement in the kitchen – with or without handles.

### **SERVO-DRIVE connects**

SERVO-DRIVE turns your kitchen into the place to be. It becomes the gathering place for family and friends.

by Blum

DYNAMIC SPACE is an initiative from Blum for a new and better kitchen standard. Plan your kitchen according to DYNAMIC SPACE guidelines for improved room utilisation and quality of motion.

[www.dynamicspace.com](http://www.dynamicspace.com)

SERVO-DRIVE won the reddot "best of the best" design award for its unique design.

### SERVO-DRIVE helps

Even with no hands, drawers and pull-outs open simply and easily. And thanks to BLUMOTION, silent and effortless closing action is guaranteed.

### SERVO-DRIVE is flexible

Whether pull-outs are; heavy... or light, wide or narrow – the gentle opening support always remains the same. SERVO-DRIVE optimises working and moving through the kitchen.

### SERVO-DRIVE made for you

During the development of SERVO-DRIVE, the focus has always been on the user. You control the technology: You determine when your drawers and pull-outs should stop, keep moving or close.

### SERVO-DRIVE is easy to deactivate

We recommend installing a commercially-available switched outlet. This makes it easy to deactivate SERVO-DRIVE. This saves energy and makes fronts easier to clean. Drawer and pull-out systems remain fully functional.
